

# Hardware modifications that need to be made to make the US GReddy “Blue” e-Manage to the JDM GReddy “Gold” e-Manage

There are a total of 2 “shorts” and 1 “jumper” that need to be made on the “Blue” board to make it electronically identical to the “Gold” board.

**These MODIFICATIONS are done at your OWN risk. I will not be held liable for any errors that you make. These are merely suggestions if YOU want to have the “Gold” features on your “Blue” e-Manage.**
